CLUB MATTERS

Beware the Ideas of March 10:03:2020

Having hoped to have Simon Bailey, Chief Constable of Norfolk, speak to us this season we were told before Christmas that he would not be able to address us personally. A deputy Inspector was lined up but unfortunately I received an email this Monday morning to say that he would not be able to attend either. **Our Chairman** and others have been ringing round to try and find someone else but, with such short notice, we have not been able to do this. We are very sorry about this but **Pat** is ready to try and make the best of a bad job. As our audio-visual representative he is a bit of a technophile and has a **3D printer which he will display and explain to us**. Even a technophobe like me has been aware of some of the claims as to the benefits 3D printers can offer. They can be used for manufacturing out of stock parts or parts on back order as well as reducing down time. Beyond that they can be used for making custom parts to make life easier as well as, more ambitiously, building cheap houses, cars, aircraft parts and the like.

I repeat our apologies but we hope you can be tempted out for this last meeting of the season. It will also be an opportunity for us to update you on plans for this summer's events and any other relevant business.
